4. Pri naslednjem koraku se nam odpre zaslon s pravili, katere s klikom na accept spodaj sprejmemo.

DMR-ID	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
Firstname	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Surname	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Visual Name	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Used for apps, lists and code-plugs
Email Address	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Personal contact in case of questions and to provide feedback.
Country	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Resolved from Callsign-Prefix, required to assign correct ID and local rules
Country/Region	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Used in some countries to support regional ID structure
City	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Zip Code	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Used in some countries to support regional ID structure
License Doc	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	removed 3 weeks after approval or rejection of request
Last Heard	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	shown in last heard lists, live streams and used for database clean-up
Network/Repeater	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	reported from most networks, shown in last heard lists and live streams

Some lists may show additional data which are transmitted live by your radio, like personal text, geo-location etc..

We do not store this data and feel not responsible for it.

The geo-location is transferred to the worldwide APRS network (Amateurradio Position Reporting System) and made visible by them on the internet.

In case that you don't want that data to be visible, check the settings of your radio, like "Talker Alias", "GPS Settings" and similar proprietary configuration and deactivate it.

In case that personal data need to be changed or removed, contact the responsible local admin please.

A list of local admins by country is available here: [contacts](#)

Data of Public Repeaters

Even though that repeaters are public stations and their data not personal, some people ask not to publish the information .

It is part of our network policy to provide best access worldwide to our networks. This requires to publish data of the "access points", which are the repeaters.

These are data of public interest like frequency, shift, color code, power, website, geo-data, location, network affiliation, status of availability, sysop callsign for contact in case of local technical issues or questions.

It is stored and shared through [APIs](#) for 3rd party systems to use it in codeplugs, show it on maps and in repeaters lists, or use it from aps etc..

PLEASE NOTE: Public repeaters can not be registered without permission to publish these basic information and allow public access.

We only register **public repeaters**, which includes public accessible data, otherwise it is not of any interest for our public Amateur Radio networks!

If you want to do local tests only, feel free please to use any DMR-ID from the block of **test IDs** and run it without network access.

Without network access there is no need for coordination and registration for that ID-range.

Please note that some systems report their settings from the local configuration (like MMDVM) or from network server systems to this database.

We cannot make changes to data which are provided by realtime reporting from the networks.

Last update: 2018-08-18

Accept Data Protection and Storage Regulations

5. Zadnji korak, vpišemo podatke v spodnjo tabelo in kliknemo OK. Sistem od nas nato zahteva že, da naložimo kopijo našega dovoljenja za uporabo radijske postaje v različnih formatih.

Please check all fields which are marked with a red cross!

DMR User Registration

Step 3

Please fill out the form until no fields are marked with a red cross.

You can submit data at any time using the 'OK' button to verify it or get additional data from databases.

For legal reasons we need your full name to approve your request. Without it we cannot grant access to the internet services.

The visual name will be used for lists, live monitors and used in files for codeplugs.

Your real name and email address will not be shown to other users or shared with 3rd party.

Depending on your local country the system needs information on region/state/county to provide the correct DMR-ID.

The DMR-ID which is shown at the end of the process will be confirmed by email after verification.

Necessary informationen for the registration:

Callsign: ✓ S56TFO

First Name: ✗

Surname: ✗

Visual name: ✗

Email Address: ✗

Country: Slovenia

City: ✗

Zip code: ✗

Comment to the admins:

In case of questions or issues contact your local admin please: tilen_cestnik@yahoo.com
